

Weekly OEE Insight Report - Fillpac 1 & 2 (Packer 1 + Packer 2)

Weekly executive summary with quantified insights, loss drivers and action priorities

Report Week: Week 36

Start Date: 31st August 2026 End Date: 7th September 2026

Contents

Section	Main heading	Page

3	Quality, Fault Risk and Improvement Opportunity	5
4	Action Plan: What to Do Next Week	6

1. Executive Insight Dashboard

This page explains the verified OEE results in plain language for operations, maintenance and management users.

Summary

The current OEE is 28.77%, below the target of 85.00%. The weakest KPI is Performance at 29.95%. The strongest KPI is Quality at 98.28%.

1. Main loss driver

Fillpac 2 Main Drive Stop accounts for 54.35% of classified downtime, contributing 4933.48 minutes.

2. Performance concern

The actual performance value of 29.95% is significantly lower than the expected value of 1584.829 bags. The production gap is 1,110,240 bags.

3. Strongest KPI

Quality at 98.28%.

KPI Scorecard vs Industry Standard

KPI	Current	Industry standard	Status
OEE	28.77%	85% world-class	Critical
Availability	97.78%	90%+	On Target
Performance	29.95%	95%+	Critical
Quality	98.28%	99.9%	Below Target

Week 35 vs Week 36 Comparison

KPI / Parameter	Week 35	Week 36	Change	Management insight
OEE	-	28.77%	-	No prior week's verified data exists for comparison.
Availability	-	97.78%	-	No verified previous-week value for Availability to compare against; currently 7.78 points above the 90.00% target.
Performance	-	29.95%	-	No verified previous-week value for Performance to compare against; currently 65.05 points below the 95.00% target.
Quality	-	98.28%	-	No verified previous-week value for Quality to compare against; currently 1.62 points below the 99.90% target.

pp = percentage points, the straight difference between two percentages (e.g. 45% to 50% is +5 pp), not a percent change.

pp = percentage points, the straight difference between two percentages (e.g. 45% to 50% is +5 pp), not a percent change.

2. Why OEE Is Going Down

Rank	Fault code / parameter	Loss	Insight from data	Immediate action
1	Fillpac 2 Main Drive Stop	4933.48 min	Fillpac 2 Main Drive Stop accounts for 4933.48 minutes of recorded downtime.	Prioritize investigation of Fillpac 2 Main Drive Stop using available production and equipment records.
2	Fillpac 1 Main Drive Stop	3739.90 min	Fillpac 1 Main Drive Stop accounts for 3739.90 minutes of recorded downtime.	Prioritize investigation of Fillpac 1 Main Drive Stop using available production and equipment records.
3	Fillpac 2 Belt Not Running	404.24 min	Fillpac 2 Belt Not Running accounts for 404.24 minutes of recorded downtime.	Prioritize investigation of Fillpac 2 Belt Not Running using available production and equipment records.
Decision point Prioritize investigating the Fillpac 2 Main Drive Stop to reduce downtime and improve overall OEE.				

Fillpac 2 Main Drive Stop accounts for 54.35% of classified downtime, contributing 4933.48 minutes.

Shift changeover delay is a controllable availability loss. Week 36 data show delay time during handover and start-up stabilization.

Shift changeover	Delay time
Shift A Changeover Delay	1977.86 min
Shift B Changeover Delay	82.14 min
Shift C Changeover Delay	160.36 min
Total Week 36 delay	2220.36 min

2.2 Spout Downtime by Machine - Week 36

Spout-level downtime highlights which individual spouts are driving each machine's Spout Fault minutes, so maintenance can target the specific spouts responsible rather than the machine as a whole.

Fillpac 1 (PLC_01)

Fillpac 2 (PLC_02)

3. Quality, Fault Risk and Improvement Opportunity

The quality loss is 1.72% with Out of Limit Bags accounting for 65.77% of the recorded quality loss and Burst Bags contributing 34.23%.

Code	Parameter	Quantity	What it means	Control action
1	Good Bags	474589 bags	Good Bags represents 98.28% of total bags produced this week.	Baseline reference — no corrective action required.
2	Out of Limit Bags	5475 bags	Out of Limit Bags represents 1.13% of total bags produced this week.	Review process records associated with Out of Limit Bags and prioritize corrective action.
3	Burst Bags	2849 bags	Burst Bags represents 0.59% of total bags produced this week.	Review process records associated with Burst Bags and prioritize corrective action.

Quality insight

Out of Limit Bags account for 65.77% of the recorded quality loss, totaling 5,475 bags.

4. Action Plan: What to Do Next Week

Actions are prioritized from the verified OEE losses and AI-generated recommendations.

Priority	Owner	Fault code	Action	Success measure	Review frequency
P1	Maintenance + Production	Maintenance + Production	Fillpac 2 Main Drive Stop	Reduce Fillpac 2 Main Drive Stop downtime (currently 4933.48 minutes this week) to recover Availability.	Cut Fillpac 2 Main Drive Stop downtime versus this week's 4933.48 minutes.
P1	Maintenance + Production	Maintenance + Production	Fillpac 1 Main Drive Stop	Reduce Fillpac 1 Main Drive Stop downtime (currently 3739.90 minutes this week) to recover Availability.	Cut Fillpac 1 Main Drive Stop downtime versus this week's 3739.90 minutes.
P1	Maintenance + Production	Maintenance + Production	Fillpac 2 Belt Not Running	Reduce Fillpac 2 Belt Not Running downtime (currently 404.24 minutes this week) to recover Availability.	Cut Fillpac 2 Belt Not Running downtime versus this week's 404.24 minutes.
P2	Production	Production	Out of Limit Bags	Reduce Out of Limit Bags (currently 5475 bags this week) to recover Quality yield.	Cut Out of Limit Bags bags versus this week's 5475 bags.
If action is completed		Expected change	Approx. OEE result		Management decision
Fillpac 2 Main Drive Stop reduced		Availability improves first	~54.07%		Continue the countermeasure until stable
Fillpac 2 Main Drive Stop plus Fillpac 1 Main Drive Stop addressed		Near-target recovery	~70.94%		Shift focus to Out of Limit Bags, the next-largest quality contributor
Availability stable + Out of Limit Bags reduced		Target recovery	~85.00%		Standardize the new checks into SOP
