1. Executive Insight Dashboard

This page explains the verified OEE results in plain language for operations, maintenance and management users.

Summary

The current OEE is 98.29%, which is on target at 85.00%. Availability is 98.33% and Performance is 100.00%. Quality is 99.96%. The weakest KPI is Availability at 98.33%. The strongest KPI is Performance at 100.00%.

1. Main loss driver

The largest downtime contributor is Fillpac 2 Main Drive Stop with 2792.10 minutes of classified downtime. This represents 44.27% of the total classified downtime.

2. Performance concern

Performance is currently at 100.00%, which is a significant increase from the previous week's performance of 39.14%. The production gap is 0.

3. Strongest KPI

Performance is the strongest KPI at 100.00%

KPI Scorecard vs Industry Standard

KPI	Current	Industry standard	Status
OEE	98.29%	85% world-class	On Target
Availability	98.33%	90%+	On Target
Performance	100.00%	95%+	On Target
Quality	99.96%	99.9%	On Target

Week 37 vs Week 38 Comparison

KPI / Parameter	Week 37	Week 38	Change	Management insight
OEE	38.34%	98.29%	+59.95 pp	Availability decreased by 0.55 percentage points, Performance increased by 60.86 percentage points and Quality increased by 0.89 percentage points from the previous week. OEE changed by 59.95 percentage points.
Availability	98.88%	98.33%	-0.55 pp	Availability decreased by 0.55 pp week over week; currently 8.33 points above the 90.00% target.
Performance	39.14%	100.00%	+60.86 pp	Performance improved by 60.86 pp week over week; currently 5.00 points above the 95.00% target.
Quality	99.07%	99.96%	+0.89 pp	Quality improved by 0.89 pp week over week; currently 0.06 points above the 99.90% target.

pp = percentage points, the straight difference between two percentages (e.g. 45% to 50% is +5 pp), not a percent change.

pp = percentage points, the straight difference between two percentages (e.g. 45% to 50% is +5 pp), not a percent change.

2. Why OEE Is Going Down

Rank	Fault code / parameter	Loss	Insight from data	Immediate action
1	Fillpac 2 Main Drive Stop	2792.10 min	Fillpac 2 Main Drive Stop accounts for 2792.10 minutes of recorded downtime.	Prioritize investigation of Fillpac 2 Main Drive Stop using available production and equipment records.
2	Fillpac 2 Belt Not Running	1800.65 min	Fillpac 2 Belt Not Running accounts for 1800.65 minutes of recorded downtime.	Prioritize investigation of Fillpac 2 Belt Not Running using available production and equipment records.
3	Fillpac 1 Main Drive Stop	1714.11 min	Fillpac 1 Main Drive Stop accounts for 1714.11 minutes of recorded downtime.	Prioritize investigation of Fillpac 1 Main Drive Stop using available production and equipment records.
Decision point The weakest KPI is Availability at 98.33%. Investigate Fillpac 2 Main Drive Stop and its impact on downtime.				

The largest downtime contributor is Fillpac 2 Main Drive Stop with 2792.10 minutes of classified downtime. This represents 44.27% of the total classified downtime.

Shift changeover delay is a controllable availability loss. Week 38 data show delay time during handover and start-up stabilization.

Shift changeover	Delay time
Shift A Changeover Delay	837.93 min
Shift B Changeover Delay	47.31 min
Shift C Changeover Delay	21.27 min
Total Week 38 delay	906.51 min

2.2 Spout Downtime by Machine - Week 38

Spout-level downtime highlights which individual spouts are driving each machine's Spout Fault minutes, so maintenance can target the specific spouts responsible rather than the machine as a whole.

Fillpac 1 (PLC_01)

Fillpac 2 (PLC_02)

3. Quality, Fault Risk and Improvement Opportunity

The current quality loss is 0.04%. The largest contributor to this loss is Out of Limit Bags with 2,974 bags (67.85% of recorded quality loss).

Code	Parameter	Quantity	What it means	Control action
1	Good Bags	11575417 bags	Good Bags represents 99.96% of total bags produced this week.	Baseline reference — no corrective action required.
2	Out of Limit Bags	2974 bags	Out of Limit Bags represents 0.03% of total bags produced this week.	Review process records associated with Out of Limit Bags and prioritize corrective action.
3	Burst Bags	1409 bags	Burst Bags represents 0.01% of total bags produced this week.	Review process records associated with Burst Bags and prioritize corrective action.

Quality insight

Out of Limit Bags account for 2,974 bags of recorded quality loss. This represents 67.85% of the total recorded quality loss.

4. Action Plan: What to Do Next Week

Actions are prioritized from the verified OEE losses and AI-generated recommendations.

Priority	Owner	Fault code	Action	Success measure	Review frequency
P1	Maintenance + Production	Maintenance + Production	Fillpac 2 Main Drive Stop	Reduce Fillpac 2 Main Drive Stop downtime (currently 2792.10 minutes this week) to recover Availability.	Cut Fillpac 2 Main Drive Stop downtime versus this week's 2792.10 minutes.
P1	Maintenance + Production	Maintenance + Production	Fillpac 2 Belt Not Running	Reduce Fillpac 2 Belt Not Running downtime (currently 1800.65 minutes this week) to recover Availability.	Cut Fillpac 2 Belt Not Running downtime versus this week's 1800.65 minutes.
P1	Maintenance + Production	Maintenance + Production	Fillpac 1 Main Drive Stop	Reduce Fillpac 1 Main Drive Stop downtime (currently 1714.11 minutes this week) to recover Availability.	Cut Fillpac 1 Main Drive Stop downtime versus this week's 1714.11 minutes.
P2	Production	Production	Out of Limit Bags	Reduce Out of Limit Bags (currently 2974 bags this week) to recover Quality yield.	Cut Out of Limit Bags bags versus this week's 2974 bags.
If action is completed		Expected change	Approx. OEE result		Management decision
Fillpac 2 Main Drive Stop reduced		Availability improves first	~98.29%		Continue the countermeasure until stable
Fillpac 2 Main Drive Stop plus Fillpac 2 Belt Not Running addressed		Near-target recovery	~98.29%		Shift focus to Out of Limit Bags, the next-largest quality contributor
Availability stable + Out of Limit Bags reduced		Target recovery	~98.29%		Standardize the new checks into SOP
