1. Executive Insight Dashboard

This page explains the verified OEE results in plain language for operations, maintenance and management users.

Summary

The current OEE is 53.57%, below the target of 85.00%. Performance is the weakest KPI at 54.87%, while Quality is the strongest at 99.85%.

1. Main loss driver

Fillpac 4 Belt Not Running accounts for 178.81 minutes of classified downtime, representing 37.91% of total classified downtime.

2. Performance concern

The actual good bags produced are 35,913 while the expected good bags were 65,450. This represents a production gap of 29,537 bags.

3. Strongest KPI

Quality is the strongest KPI at 99.85%.

KPI Scorecard vs Industry Standard

KPI	Current	Industry standard	Status
OEE	53.57%	85% world-class	Critical
Availability	97.77%	90%+	On Target
Performance	54.87%	95%+	Critical
Quality	99.85%	99.9%	Below Target

Week 9 vs Week 10 Comparison

KPI / Parameter	Week 9	Week 10	Change	Management insight
OEE	0.00%	53.57%	+53.57 pp	Availability increased by 97.77 percentage points from the previous week, Performance increased by 54.87 percentage points from the previous week, and Quality increased by 99.85 percentage points from the previous week.
Availability	0.00%	97.77%	+97.77 pp	Availability improved by 97.77 pp week over week; currently 7.77 points above the 90.00% target.
Performance	0.00%	54.87%	+54.87 pp	Performance improved by 54.87 pp week over week; currently 40.13 points below the 95.00% target.
Quality	0.00%	99.85%	+99.85 pp	Quality improved by 99.85 pp week over week; currently 0.05 points below the 99.90% target.

pp = percentage points, the straight difference between two percentages (e.g. 45% to 50% is +5 pp), not a percent change.

pp = percentage points, the straight difference between two percentages (e.g. 45% to 50% is +5 pp), not a percent change.

2. Why OEE Is Going Down

Rank	Fault code / parameter	Loss	Insight from data	Immediate action
1	Fillpac 4 Belt Not Running	178.81 min	Fillpac 4 Belt Not Running accounts for 178.81 minutes of recorded downtime.	Prioritize investigation of Fillpac 4 Belt Not Running using available production and equipment records.
2	Fillpac 2 Belt Not Running	147.98 min	Fillpac 2 Belt Not Running accounts for 147.98 minutes of recorded downtime.	Prioritize investigation of Fillpac 2 Belt Not Running using available production and equipment records.
3	Fillpac 1 Belt Not Running	102.21 min	Fillpac 1 Belt Not Running accounts for 102.21 minutes of recorded downtime.	Prioritize investigation of Fillpac 1 Belt Not Running using available production and equipment records.
4	Fillpac 4 Main Drive Stop	15.97 min	Fillpac 4 Main Drive Stop accounts for 15.97 minutes of recorded downtime.	Prioritize investigation of Fillpac 4 Main Drive Stop using available production and equipment records.
Decision point Prioritize investigation of the largest supplied downtime driver, Fillpac 4 Belt Not Running.				

Fillpac 4 Belt Not Running accounts for 178.81 minutes of classified downtime, representing 37.91% of total classified downtime.

Shift changeover delay is a controllable availability loss. Week 10 data show delay time during handover and start-up stabilization.

Shift changeover	Delay time
Shift A Changeover Delay	0.00 min
Shift B Changeover Delay	0.00 min
Shift C Changeover Delay	207.03 min
Total Week 10 delay	207.03 min

2.2 Spout Downtime by Machine - Week 10

Spout-level downtime highlights which individual spouts are driving each machine's Spout Fault minutes, so maintenance can target the specific spouts responsible rather than the machine as a whole.

Fillpac 1 (PLC_01)

Fillpac 2 (PLC_02)

Fillpac 3 (PLC_03)

Fillpac 4 (PLC_04)

No spout downtime recorded

3. Quality, Fault Risk and Improvement Opportunity

The total bad bags are 53 bags, representing a quality loss of 0.15%. The largest contributor to this loss is Burst Bags at 53 bags (100.00% of recorded quality loss).

Code	Parameter	Quantity	What it means	Control action
1	Good Bags	35913 bags	Good Bags represents 99.85% of total bags produced this week.	Baseline reference — no corrective action required.
2	Burst Bags	53 bags	Burst Bags represents 0.15% of total bags produced this week.	Review process records associated with Burst Bags and prioritize corrective action.

Quality insight

Burst Bags account for 53 bags of recorded quality loss.

4. Action Plan: What to Do Next Week

Actions are prioritized from the verified OEE losses and AI-generated recommendations.

Priority	Owner	Fault code	Action	Success measure	Review frequency
P1	Maintenance + Production	Maintenance + Production	Fillpac 4 Belt Not Running	Reduce Fillpac 4 Belt Not Running downtime (currently 178.81 minutes this week) to recover Availability.	Cut Fillpac 4 Belt Not Running downtime versus this week's 178.81 minutes.
P1	Maintenance + Production	Maintenance + Production	Fillpac 2 Belt Not Running	Reduce Fillpac 2 Belt Not Running downtime (currently 147.98 minutes this week) to recover Availability.	Cut Fillpac 2 Belt Not Running downtime versus this week's 147.98 minutes.
P1	Maintenance + Production	Maintenance + Production	Fillpac 1 Belt Not Running	Reduce Fillpac 1 Belt Not Running downtime (currently 102.21 minutes this week) to recover Availability.	Cut Fillpac 1 Belt Not Running downtime versus this week's 102.21 minutes.
P1	Maintenance + Production	Maintenance + Production	Fillpac 4 Main Drive Stop	Reduce Fillpac 4 Main Drive Stop downtime (currently 15.97 minutes this week) to recover Availability.	Cut Fillpac 4 Main Drive Stop downtime versus this week's 15.97 minutes.
If action is completed		Expected change	Approx. OEE result		Management decision
Fillpac 4 Belt Not Running reduced		Availability improves first	~67.71%		Continue the countermeasure until stable
Fillpac 4 Belt Not Running plus Fillpac 2 Belt Not Running addressed		Near-target recovery	~77.14%		Shift focus to Burst Bags, the next-largest quality contributor
Availability stable + Burst Bags reduced		Target recovery	~85.00%		Standardize the new checks into SOP
